

PRECIOUS & SPECIALTY METALS

Global sourcing. Transparent trade.

Reliable access to materials that matter.

Pallam Metals connects industrial clients with precious, minor and rare earth metals through pragmatic execution, technical understanding and clear commercial communication.

OUR ROLE

Closing critical supply gaps with commercial clarity.

Where circular recovery is not yet possible or sufficient, Pallam Metals strategically sources precious and specialty metals worldwide. We connect industrial clients with reliable metal supply, market insight and transparent commercial execution.

RESOURCEFUL

We identify value and sourcing routes where others see complexity - from strategic metals to industrial material streams.

RELIABLE

We prioritise clear documentation, fast decision-making and pragmatic commercial proposals.

COLLABORATIVE

We combine your operational knowledge with our technical and commercial expertise to find the right route.

FROM THE NETHERLANDS TO THE WORLD

Materials. Insight. Execution.

WHAT WE DO

Trading backed by technical understanding.

01 PRECIOUS & SPECIALTY METAL TRADING

Fast, pragmatic offers for precious and specialty metal assets. Based on analysis, photos, weights and available material information, we assess the commercial potential and create a clear proposal.

02 GLOBAL SOURCING

Reliable access to industrial-grade metals through an international network. We support clients that need a commercially sound sourcing route for critical materials.

03 TECHNICAL EXPERTISE & CONSULTANCY

Practical insight into metal compositions, industrial applications and material value. We help clients understand streams, reduce uncertainty and identify the best commercial or circular route.

04 CIRCULAR VALUE ROUTING

Where recovery is feasible, we connect sourcing and trading with circular opportunities through the broader Pallam family, helping clients reduce material losses and capture more value.

PRACTICAL BY DESIGN

Clear routes. Clear proposals. Clear next steps.

METAL PORTFOLIO

Materials for critical industrial applications.

Our portfolio includes precious metals, selected minor metals and rare earth elements used across demanding industries. Availability, specifications and documentation are confirmed per request.

PRECIOUS METALS

Pt Platinum
Pd Palladium
Rh Rhodium
Ir Iridium
Ru Ruthenium
Au Gold
Ag Silver

MINOR METALS

Hf Hafnium
Ge Germanium
Ga Gallium

RARE EARTH ELEMENTS

Y Yttrium
Nd Neodymium
Gd Gadolinium
Pr Praseodymium
Er Erbium

REQUEST A MATERIAL MATCH FOR YOUR APPLICATION

HOW WE WORK

A practical route from request to execution.

Every assignment is different. Our commercial process is designed to establish the essentials quickly, reduce ambiguity and move toward a workable proposal.

01 SHARE THE REQUIREMENT

Tell us what you need to source, sell or evaluate. For material offers, provide the available analysis, photos, weights and origin information where relevant.

02 REVIEW

We assess the material, intended application and available documentation to define a suitable route.

03 CLEAR PROPOSAL

You receive a pragmatic proposal with the next steps, documentation requirements and commercial framework.

04 COORDINATED EXECUTION

We coordinate the transaction and remain available as a responsive partner throughout the process.

START WITH THE ESSENTIALS

Analysis | Photos | Weights | Origin information

MARKETS

Supporting industries where materials make the difference.

PHARMA & CHEMICALS

Precious metals, catalysts and industrial materials for demanding production environments, with a focus on quality, traceability and commercial reliability.

JEWELLERY & LUXURY MANUFACTURING

Precious metals and alloys for brands and manufacturers seeking purity, traceability and responsible sourcing.

MINING & NATURAL RESOURCES

Commercial routes for by-products, residues and complex materials, supported by market knowledge and technical understanding.

ADVANCED INDUSTRY

Strategic metals for applications in catalysts, coatings, electronics, clean technologies, aerospace, semiconductors and advanced manufacturing.

PART OF A BROADER MATERIALS ECOSYSTEM

Pallam Metals provides global sourcing and trading. Within the Pallam family, complementary capabilities support circular recovery and cleaner industrial production where relevant.

LET US TALK

Let us create lasting value together.

Whether you are looking to source metals, monetise a material stream or evaluate the best commercial route, start the conversation with Pallam Metals.
